ZÜCHTEREI.

KUNST-UND
HANDELSGÄRTNEREI.

Telegramm-Adresse: Martin Grashoff. Telephon-Anschluss N° 6.

All previous price-lists are hereby cancelled.

S. T.

I have again the pleasure of presenting to your notice an Extract of my Catalogue for the ensuing season, and I hope, you will be induced by the extremely low prices to favour me with your general orders, which shall have my careful and prompt attention.

Nearly all my seeds are of my own growth and have been selected with the utmost care and attention, therefore I am enabled to assure you of their superior quality. No Complaints can be entertained unless made upon receipt of the Goods and Invoice and no Warranty or Guarantee is given, express or implied either as to description, quality, productiveness, or any other matter of any seeds sent out nor will I be responsible for the quality or value of the Crop produced therefrom.

Being able and ready to meet all respectable competition, I should be glad to be informed you are offered any article lower than these prices, and in such cases, I would give you, if possible, other quotations.

I cannot bind myself to these prices for articles subject to variations by the influence of the market, but I shall always use my best endeavours to keep within their limits.

All goods are forwarded at importer's risk. Insurance will always be effected, unless explicitly refused.

To avoid in advance any mistakes with regard to the mode of forwarding, my Correspondents are requested to state expressly, in giving their orders, by what conveyance goods are to be sent and to the care of which firm they should be consigned on transshipment; with every new order the mode of forwarding ought to be prescribed again.

Four months is the limit of credit I usually give, unless other terms are especially arranged. A discount of 4% will be allowed for cash within 20 days from the date of invoice. All accounts are due and payable at Quedlinburgh.

Remittances either by Draft, Cheque, Post Office Order or Postage Stamps, according to the importance of the amount, should accompany all orders from Firms, with which I have not yet had the pleasure of doing business; failing in this, satisfactory references, generally known, must be given to ensure the execution of such orders.

Any quantity less than 28 lbs. will be charged at pound-price, and below $\frac{1}{4}$ lb. = 4 ozs. at ounce-price.

QUEDLINBURGH, November 1899.

MARTIN GRASHOFF,

Wholesale Seed Grower and Seed Merchant.

Proprietor: **Herrmann Grussdorf,**

Royal Director of Horticulture.

Address for Telegrams: "Martin Grashoff".

6 Prize-Medals and 6 Diploma

at the World's Columbian Exposition Chicago 1893.

To meet the wishes of the majority of my Correspondents,
shall forward the following Agric., Veget., Garden- and Flower-Seeds „franco to Hamburg or Bremen“,
according to their instructions.

AGRICULTURAL-VEGETABLE AND GARDEN-SEEDS.

FLOWER SEEDS.

For many years I have used my best endeavours to obtain on my extensive grounds every possible success in cultivating most carefully my various **Flower Seeds**, producing novelties as well as improving old and known species in order to meet the demands of our present time. The whole of my cultures are subjected to a constant and strict supervision and, therefore, I can confidently recommend all the varieties enumerated in the following list. I particularly draw your attention to my fine strain of **Asters, Stocks** and other so-called **German Flower-Seeds**, which I grow on a very large scale. My prices will also be found pretty low in comparison with those of other houses and they will, I trust, induce you to favour me with your **general order in Flower Seeds**.

To my regret it has often occurred in the last season that I got orders for *Flower-seeds*, which were not distinctly and clearly defined, and thence resulted many misunderstandings alike disagreeable to me as to my est^d clients. — To give a sample of some kind, it was ordered: $\frac{1}{2}$ oz. no. 313 Dwarf German Ten Week Stock, w^{ch} number includes not less than 38 colours separate. From this order I cannot conclude, whether my correspondent wants 38 colours $\frac{1}{2}$ oz. each or only $\frac{1}{2}$ oz. in all; in the latter case it is the question, which colour, for $\frac{1}{2}$ oz. cannot be given in 38 colours. Therefore, when making out your orders, the indication of the number preceding every variety and position, as well as the name of the respective species, is quite indispensable, if you like to have your orders effectuated correctly, and, by keeping strictly to the aforesaid, all mistakes and doubts, whether separate or mixed varieties are wanted, shall be entirely avoided. At the same time I beg to call your attention to the following: „In ordering separate colours be always as kind as to state, what colours and which quantities of each colour you desire.“

○ = Annuals. ♂ = Biennials. ♀ = Perennials. ♂ = Climbers. △ = Stove and Greenhouse plants. T = Trees and Shrubs.
O = Ornamental-Grasses.

(No quantity will be charged below one penny.)

Any quantity less than $\frac{1}{4}$ lb. = 4 oz. will be charged at ounce-price.

⊙ GERMAN ASTERS.

(Aster chinensis flore plena.)

These splendid showy flowers are cultivated by me since many years on an extensive scale and with the utmost care. I have devoted great attention to their improvement and I am glad to say that my endeavours have been crowned with the success wished for, so that every single kind leaves nothing to be desired in regard to the *doubleness of the flowers, beauty and purity of the sorts and truthness in habit*. The most preferable novelties of the last years have been inserted in the following list of asters, the choice of which cannot be too highly recommended.

No.		per lb.	per oz.
		s. d.	s. d.
	Dwarf German Aster (height 6—8 inches) in 12 splendid colours.

⊙ GERMAN STOCKS.

(Cheiranthus annuus, autumnalis and incanus.)

The culture of Stocks forms one of my Specialities. They are grown by me on a very large scale, partly in pots, partly in the open ground in beds prepared only for this purpose. In cultivating them, the greatest care is applied to the good habit and purity and beauty of the colours. The seeds offered will produce 70 to 80 per cent of double flowers. My customers may confidently rely on my serving them only with seeds of very best quality, in every respect calculated to give them entire satisfaction.

New and Choice Flower Seeds.

Prices net without reduction.

Dwarf Largest flowering Chrysanthemum Aster, Light Azure blue. Novelty Grashoff 1899/1900. New distinct color of this beautiful Variety of Aster.

pr. 100 packets 30s., pr. 10 packets 4s., pr. packet 6d.

Triumph Aster, White turning to rose. Novelty Grashoff 1899/1900. Beautiful new bright color, blooming white, turning afterwards to a nice rose.

pr. 100 packets 36s., pr. 10 packets 4s. 3d., pr. packet 6d.

Model Aster, darkblue. Novelty Grashoff 1899/1900. A new splendid pure darkblue color. Height of the plant 12 inches, forming compact pillared like bouquets.

pr. 100 packets 30s., pr. 10 packets 4s., pr. packet 6d.

Dahlia variabilis "Fire King". Novelty Grashoff 1899/1900. A single flowering pure scarlet Dahlia. The Plant forms nice robust bushes of great and dense ramification. Height about 4 feet. The 3 to 4 inches large well formed numerous flowers of pure scarlet color are born on long stalks free above the green foliage, blooming from June until killed by frost. Splendid for groups, borders and especially valuable for florist purposes.

pr. 100 packets 32s., pr. 10 packets 4s., pr. packet 6d.

Dahlia variabilis "Goldelse". Novelty Grashoff 1899/1900. A fit companion to the preceding variety of pure golden yellow flowers, measuring 3 inches across. Height of the plant about 4 feet. Very valuable for cut flower growers.

pr. 100 packets 36s., pr. 10 packets 4s. 3d., pr. packet 6d.

Dahlia hybrida "Excelstior". Novelty for 1898/1899. Of the same habit as that of a single Cactus Dahlia but differing considerably in form of the flower. The petals of this novelty are rather long, slightly curled or curved, thus giving the flower a curly loose peculiar appearance.

pr. oz. 5s. 9d., pr. 1/2 oz. 10d.

Nicotiana sylvestris. Novelty 1897. Height about 4 to 5 feet. A superb decorative plant of robust branching habit and luxuriant dark green foliage. The very long pendent tubular flowers of pure white color, about 3 to 4 inches long are born in circular clusters on strong spikes above the foliage. Well adapted for borders and solitary plants.

pr. lb. 11s., pr. oz. 10d.

Cineraria hybrida foliis variegatis. White-Various Leaved Cineraria. Novelty Grashoff for 1899. The plant is a robust bush of 12 to 16 inches high, covered from the base partly with white variegated and partly with marbled foliage. This is likewise specially valuable for market and ornamental purposes.

pr. 100 packets 30s., pr. 10 packets 4s., pr. packet 6d.

Model Aster, white. Novelty Grashoff for 1899. The plant attains a height of 8 to 12 inches forming a compact pillared like bouquet covered from the base to the top with flowers.

pr. oz. 8s., pr. 1/2 oz. 1s. 3d.

Ostrich-Feather Aster, Pure-white. Growth candelabra like, flowers pure white, very much curled, resembling a large Japanese Chrysanthemum.

pr. 100 packets 10s., pr. 10 packets 1s. 3d., pr. packet 2d.

Dwarf Comet Aster "Perfection", Pure-white. Dwarf Variety of the well known white Comet Aster. Height about 7 inches. Flowers brilliant white much curled and very large. An extraordinarily early bloomer.

pr. lb. 46s., pr. oz. 3s. 2d.

Hohenzoller Aster, "Pure White". The grower recommends this novelty as a great improvement upon the white giant Comet Aster. Flowers extraordinarily large and pure white.

pr. oz. 5s. 2d., pr. 1/2 oz. 10d.

Triumph-Aster, "Darkblue". A dark blue color with splendid satin like shine.

pr. 100 packets 36s., pr. 10 packets 4s. 3d., pr. packet 6d.

Triumph-Aster "Dark purple". New superb shining color. Flowers exactly the same as the Paeony type.

pr. 100 packets 60s., pr. 10 packets 7s., pr. packet 10d.

New Large-flowering Queen of Dwarfs Aster "Brilliant Rose". Of splendid shining rose color turning to zinnabar towards the centre.

pr. 100 packets 60s., pr. 10 packets 7s., pr. packet 10d.

Dwarf Comet Aster Perfection "Rose". Possesses the same qualities as the white variety introduced last year.

pr. 100 packets 42s., pr. 10 packets 4s. 6d., pr. packet 6d.

Comet Aster "Whitish Lavender". Curious color flowering first white turning afterwards to a whitish lavender.

pr. 100 packets 36s., pr. 10 packets 4s., pr. packet 6d.

Giant Victoria Aster "Snow White". Of rather robust growth. The enormous snow white flowers about 5 inches across, are of elegant form.

pr. 100 packets 42s., pr. 10 packets 5s., pr. packet 7d.

Ostrich-feather Aster, Crimson, Rose White turning to Rose. Three new colors of this splendid type. Each color separate.

pr. 100 packets 40s., pr. 10 packets 4s. 6d., pr. packet 6d.

Begonia semperflorens "King of Zulus". Black Begonia. Of compact growth. In the open ground the foliage is of a dazzling dark black-red color, under other conditions it is green. Flowers a brilliant red, stamens golden yellow. Especially adapted for market purposes and grouping.

pr. 100 packets 30s., pr. 10 packets 3s. 6d., pr. packet 5d.

Largest flowering Winter or Brompton Stock "Empress Elizabeth". Resembling in habit the tall tree Wallflower. The large flowers are of shining carmine color. Very valuable for cut flowers.

pr. 100 packets 60s., pr. 10 packets 7s., pr. packet 10d.

Calendula officinalis fl. pl. "Favorite". Flowers of pure light sulphur yellow color, striped with a creamy white. The lightest color in the Calendula off. variety.

pr. 100 packets 40s., pr. 10 packets 5s., pr. packet 7d.

Gloxinia hybrida grandiflora "Coquette". Quite distinct from all other Gloxinias as all flowers of blue or red shining are yellow throated, in addition to this, nearly all the flowers are tricolored.

pr. 100 packets 45s., pr. 10 packets 5s., pr. packet 8d.

Papaver nudicaule sulphureum. A new variety of the well known Siberia-Poppy. The flowers are of a dull sulphur yellow color.

pr. 100 packets 30s., pr. 10 packets 3s. 6d., pr. packet 5d.

Reseda odorata grandiflora "Goliath". The raiser qualifies this mignonette as one of the most red shining variety. The flower spikes about 7 inches large are densely covered with blossoms.

pr. 100 packets 40s., pr. 10 packets 4s. 6d., pr. packet 6d.

Salpiglossis variabilis superbissima. New Emperor Salpiglossis. Growth pillared like, rather robust. The splendidly marked flowers are considerably larger than those of the old grandiflora variety. All colors mixed.

pr. 100 packets 15s., pr. 10 packets 1s. 10d., pr. packet 3d.

Salvia splendens "Silverspot". Foliage dark green with sulphur yellow or creamy white spots. Flower spikes of an intense scarlet color.

Excellent for pot culture and groups.

pr. 100 packets 70s., pr. 10 packets 8s., pr. packet 1s.

Torenia Fournieri speciosa Princess Helen of Montenegro. Valuable novelty of robust elegant growth. Unfailing new giant flowering race with large china-blue flowers, with deep indigo-blue blotches. Excellent for market purposes and decorative plants.

pr. 100 packets 40s., pr. 10 packets 5s., pr. packet 8d.

Torenia Fournieri speciosa "The Bride". A fit companion to the preceding variety differing only by its pure white upper lip, whilst the under lip and side petals are of a delicate pink, the bottom of the throat being golden yellow.

pr. 100 packets 50s., pr. 10 packets 6s., pr. packet 9d.

Viola tricolor maxima "Variabilis". New valuable variety. The principal colors are chamois, saumon rose and Terraotta, all with violet eye.

pr. 100 packets 42s., pr. 10 packets 5s., pr. packet 7d.

Viola tricolor maxima "Germania". Of very robust growth and surprising large foliage, flowers extremely large, five blotched, slightly curled on the border. This variety contains many dark colors.

pr. 100 packets 45s., pr. 10 packets 5s., pr. packet 7d.

Novelties of *Helianthus cucumerifolius* for 1899/1900.

Prices net without reduction.

The *Helianthus cucumerifolius* varieties are besides the double flowered Cactus Dahlia undoubtedly of first rank for cut flowers and therefore unequalled for florist and decorative purposes as well as for solitary plants.

By rigorous selection I have obtained several varieties which in regard to elegance of form, size and shape of flower differs most advantageously from one another.

The Growth of the Plant is of elegant pyramidal compact form, vigorous ramification measuring about 30 inches in diameter.

The height differs according to the variety.

These *Helianthus* varieties are especially remarkable for their rich profusion of flowering. Each plant bears in average 80 to 100 pure golden yellow flowers with black centre, born on long erect stalks above the dark green foliage, blooming from June until late in autumn.

A great acquisition for all florist purposes and especially of high value for cut flower growers.

Next season I hope to be able to introduce a white variety.

At present I recommend the following varieties.

Helianthus cucumerifolius grandiflorus „Stella“.

Height about 5 feet, flowers 5 to 6 inches across, those of the old variety attains only 3 inches.

1 oz. 20s., $\frac{1}{8}$ oz. 3s.; 100 packets 28s., 10 packets 3s. 3d., 1 packet 5d.

Helianthus cucumerifolius grandiflorus „Giant Star“.

Height about 5 feet, flowers 5 to 6 inches across, those of the Ray Sun attains only 3 inches.

The tubular formed extrosal petals are closed densely round about the centre, resembling a modern large flowering single Cactus Dahlia.

100 packets 30s., 10 packets 3s. 6d., 1 packet 5d.

Helianthus cucumerifolius „Excelsior“.

Height about 4 feet, flowers 3 inches across. The Petals are rather long, turned and curled, resembling a single Hybrid-Cactus Dahlia but the petals of the former are more densely closed round about the centre than those of the latter.

1 oz. 20s., $\frac{1}{8}$ oz. 3s.; 100 packets 28s., 10 packets 3s. 3d., 1 packet 5d.

Helianthus cucumerifolius grandiflorus „Excelsior“.

Height about 5 feet, flowers 5 to 6 inches across. Identical in habit and character as the preceding variety, but the flower is at least twice as large.

1 oz. 20s., $\frac{1}{8}$ oz. 3s.; 100 packets 28s., 10 packets 3s. 3d., 1 packet 5d.

Helianthus cucumerifolius grandiflorus „flore pleno“.

Height about 4 feet. The flowers 3 inches across are of golden yellow color, quite extra double, flat vaulted and bordered with a ruffle of partly rolled, partly smooth petals.

100 packets 40s., 10 packets 4s. 6d., 1 packet 5d.

Helianthus cucumerifolius „Ray Sun“.

Height about 4 feet, flowers 3 inches across. For description I refer to my last years catalogue.

1 oz. 12s. 6d., $\frac{1}{8}$ oz. 1s. 9d.; 100 packets 18s., 10 packets 2s., 1 packet 3d.

Helianthus cucumerifolius „Stella“.

(Novelty 1896.)

Height about 4 to 5 feet, of regularly pyramidal shape. Flowers of pure golden yellow color with deep black centre and elegant form, measuring 3 inches across.

Very valuable for florist purposes, groups and solitary plants.

1 lb. 4s. 1d., 1 oz. 4d.; 100 packets 6s., 10 packets 9d., 1 packet 5d.
